Our Little Louise Showing a Bloom  
Cut From Planting Stock

Part of our planting stock.

Atala grown from planting stock.

## GREETINGS, FRIENDS:

Thanks again for the past favors. They were deeply appreciated and we hope that we shall continue to receive your favors.

We are going to offer a few Do's and Don'ts for your Glad Garden.

First: open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable cellar, or a place where it is not too warm or too cold.

Second: all Glad bulbs must be dipped before planting in order to kill any thrips or disease that may be on them. We use Lysol. One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before planting. Any water container will do for soaking.

Third: after your soil has been prepared in the Spring of the year, furrow out your rows and scatter in the bottom of the trench, a good Commercial fertilizer such as being sold in your community for vegetables. Mix fertilizer well with the soil and cover with two inches of soil. Now you are ready to plant your bulbs. Set large bulbs about five inches deep and five inches apart; other size bulbs in proportion, with the smallest about two inches deep and two inches apart.

Fourth: do not plant near building, heavy rooted plants such as trees, etc. Cultivate frequently enough to keep soil loose, and free from weeds, not deep, and after every heavy rain or watering.

Fifth: spraying and dusting for thrip (adults are small black insects about 1/16 of an inch long) we have used the two following formulas:

DDT Spray — 2 rounded teaspoonsfuls DDT (50%) wettable; 1 teaspoonful Dreft; 2 gallons water, mix and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. Not as effective as spraying but very much faster.

Dust once in about every 10 days after foliage is 8 to 10 inches high. Do not use DDT dust on blooms as it will spot.

A good idea is to sprinkle bulbs with 5% DDT dust while bulbs are in storage.

Sixth: when cutting blooms be sure and leave at least four leaves so as to mature the bulb. Bulbs should be dug as soon as the foliage starts to become yellow or about five weeks or so after blooming date or after frost. Dig bulbs when the soil is dry if possible using a digging fork, and lifting bulbs by the foliage. Cut off the tops close to the bulbs shaking out loose dirt. Place bulbs in shallow wooden trays or clean paper bags, marking each variety.

Seventh: curing and cleaning bulbs; remove all bulbs to a warm dry place where there is a good circulation of air. After a period of three or four weeks, or when bulbs are properly dried, old bulb is easily broken away from the base of the new bulb. Be sure and leave husk on bulb, as this is a protection in storing. Ideal storage temperature is between 34 and 45 degrees F., or in a good vegetable cellar.

Terms of sale: cash with order, or twenty-five per cent with the balance paid C. O. D. Cash must accompany wholesale orders wanted by parcel post **AS THESE ARE NOT PREPAID**. If you should send more than the carrying charges, we shall make refunds. No order for less than two dollars and no item for less than ten cents please. We have made our prices low enough so as to eliminate all confusing discounts. We are liberal with our overcounts. All retail orders will be sent prepaid. If out of size wanted, we will ship next size, giving equal or better value.

These are State inspected bulbs. We try to observe the fact that making friends is very essential to our business.

Sincerely yours,

Taylor Gardens

YOU CANNOT GO WRONG ON THESE COLLECTIONS AS THEY ARE TAKEN FROM OUR REGULAR LIST OF STOCK.

AUNT LEA

AUNT LEA, a very clear light orange with a cream white throat; under a light, it throws a slight golden tint bloom  $4\frac{1}{2}$  to 5 inches on a tall spike; an excellent variety.

JEANNE'S CHOICE, our introduction for this year medium early white with slight deep rose edging and with a purple rose blotch, opens 6 to 7 large blooms on a tall spike, very well liked.

JEANNE'S CHOICE
